Service

Incident System Tab Visibility

Incident System Tab Visibility linked to Clearance Levels

Pulse and DevOps - Add Work item integration

Pulse and DevOps - Add Work item integration

Appointments Check Incident Mandatory Fields

New function `isIncidentChangeAllowed` to check status next, category and custom field rules on the incident when making or updating an event.

Bill for System enhancements

Enhancements on Invoices and Credit Notes to store information history related to the Billing of Systems.

Send Message Enhancements

Send Message off an Incident now supports pasting of Images director into the Message Editor

Enhancement to Structured Email processing.

Enhancement to Structured Email processing.

Add a checkbox per category to tell structured email processing if it should add a new category value that is present in an incoming email

but is not yet in the category value collection.

Financials

Invoice Mailer Attachment whitelist

A list of file extensions attachments whitelisted to be sent with the Invoice, when the Financial Invoice Mailer runs

Chat on Invoices

We have added chat to the invoice document.

Chat on Credit Notes

We have added chat to the credit note document. At the same time we have updated the layout to be in line with the rest of Pulse's financial documents.

Payments Filterable by Credit Controller

The Payments listing can be filtered by credit controller.

Projects

Inventory

Stock take locking for warehouse stock takes

Stock is now locked while doing a warehouse stock take.

Client Portal

Core

Chat on Clients

We have added chat to the client entity.
